

ADDING REAL WORDS

guided notes

ADDING REAL WORDS TO YOUR APP

What does the ActiveRecord method `where` do?

How about the `find` method?

What is the difference between the two?

What is a dynamic finder?

You need to run a migration on your TEST database, what command will you need to run?

Fill in the missing pieces:

```
rake db:migrate
```

What do we mean by “brute force”? Why do you think we are using that term for how we are telling you to look up words in your dictionary?
