

ADDING MORE WORDS TO YOUR ANAGRAM APP

guided notes

ADDING MORE WORDS

What should you call the controller for your new dictionary? Fill in the blank:

_____controller.rb

You are going to make a landing page for your dictionary using this controller action:

```
get '/words' do
  erb :"/words/index"
end
```

If you wanted to make it possible to go to the /dictionary URL, what would you need to change?

Your word now has a few different properties? If you want to print out the word itself, what do you need to write?

```
<%= %>
```
