

PARTIALS & HELPERS

guided notes

PARTIALS & HELPERS

What is the purpose of a partial? How do they relate to DRY?

If you want to include a partial in a template, what tag do you use to do so? Fill it in:

<%=

%>

What should you title your partial file? Fill in the blank:

.erb

Why are partials titled this way?

What is one reason why you should use a helper method?

Where do you write your helper methods? What folder does that file go in?
