

FORMS & CRUD

guided notes

FORMS & CRUD

In your controller, what is the ActiveRecord method you will use to make a new person?

Fill in the blank:

```
person = Person._____(first_name: params[:first_name],  
last_name: params[:last_name], birthdate: params[:birthdate])
```

Connect the file to the action you will use it to do (draw a line between the two):

index.erb	Create a new person
edit.erb	Show a specific resource
new.erb	Show ALL the resources in your database
show.erb	Edit an existing resource

To make a form that will EDIT an existing person you need to add the following (fill in the blanks):

```
<input type="_____" name="_____" value="_____" />
```

To make a form that will DELETE a person you need to add the following (fill in the blanks):

```
<input type="_____" name="_____" value="_____" />
```
